

We VALUE AND SUSTAIN memory care neighborhoods characterized BY EXCELLENCE.

As fearless advocates for persons living with dementia, our team preserves dignity, shows love and provides opportunities for purposeful pursuits. In daily life, our community offers:

### Caring

We care deeply about whole person care. That is why we focus on growing our knowledge of dementia, how to support those living with it, and how to nurture all aspects of well-being. Our staff are expertly trained and empowered to provide the care people need, when and how they need it.

### Engaging

We curate a lifestyle of purpose. Creating a cadence that inspires residents to live out their potential, we thoughtfully design each day with residents' hobbies, interests, histories and unique abilities in mind. Inspiring residents to live intentionally isn't just a philosophy, it's what we do.

### Connecting

We foster authentic connection by providing opportunities to get to know each other and share meaningful experiences for everyone who works, lives and visits our communities. It is the intentional touches like those of our "Feels like Home" and "Hands to Help" programs that go deeper in connecting people at the heart level. It's a difference you can feel.

For more information about life well lived with Northstar memory care, call **760-295-8515**.

## Peace of mind POWERED BY state-of-the-art ENGAGEMENT TECHNOLOGY.

We invest in a comprehensive technology tool that fosters communication, enhances the resident experience, maintains connectivity and enriches well-being.

Utilizing resident preferences, histories and habits, our calendars are expertly designed to meet the needs of those requiring memory care. Supported by advanced technology, coupled with human experience, Sagely's® smart technology personalizes and optimizes monthly program calendars to deliver a curated lifestyle your loved one deserves.

Experience the power of a  
connected community.

**Inform.** See upcoming events, menus, photos and more during your visits via our beautiful digital displays. View calendars, RSVP to our events and receive updates from the community via the messaging app. This aspect of the tool lets us measure resident participation and keep our families involved.

**Track.** We can take activity attendance with the tap of a finger, generate reports around residents' well-being, and identify needs and trends.

**Connect.** Connecting with the community via the family app. You're kept informed about your loved one, can share in their activities, and can see their photos and their schedules in real time. This helps us to develop stronger connections and richer experiences for your loved one.
